

## **engcon to exhibit at the international machine trade show CONEXPO-CON/AGG 2023 in Las Vegas**

**On March 14–18, it's time for the year's largest machine trade show, CONEXPO-CON/AGG 2023, in Las Vegas, USA. The focus for engcon will be showcasing the tiltrotator and its benefits. At engcon's booth, there will be three different excavators demonstrating the advantages of equipping an excavator with a tiltrotator. In addition to the tiltrotator taking center stage, engcon will display its wide range of excavator attachments.**

The Swedish tiltrotator manufacturer engcon supplies tiltrotators, tools and attachments for excavators all over the world. The range, which is well established in the Nordics, has in recent years expanded to large parts of Europe and North America. engcon established its operations in the USA in 2017 and exhibiting at CONEXPO is another step in engcon's ambition to develop further the North American market.

“We know how important it is to see our products in action because many people can hardly believe that the tiltrotator is really as efficient as it actually is. That's why we put a lot of focus on running demonstrations at our CONEXPO booth”, says Martin Engström, Product Manager at engcon, and continues:

“With our tiltrotator, efficiency and safety increase. A tiltrotator together with our attachments replaces other machines and contributes to the job being done more efficiently. With our solutions, the driver can safely remain in the cab and change attachments and buckets. In this way, the tiltrotator is an excellent investment for those who want to catch up on more assignments in a shorter time.”

### **engcon presents EC-Oil**

EC-Oil, which is engcon's system for automatic coupling of hydraulic tools, will also be demonstrated on site.

“With EC-Oil, you can safely change attachments in seconds, and you avoid hoses or electrical cables that move when connecting, which reduces the risk of crushing damage and wear and tear”, says Martin Engström.

At engcon's booth, visitors can meet several well-known excavator influencers who use engcon's products daily in their work. There is also the opportunity to test-drive an excavator with a tiltrotator yourself, or see an experienced driver demonstrate how to best work with the market's most modern equipment.

At engcon's booth F8533, two machines will be available for test driving, a John Deere 85G and Caterpillar Cat 306. As a demo machine, there is a John Deere 135G with various attachments, both buckets and other hydraulic tools.
